

Executive Summary

Annual Church Profile (ACP) 2024 data were used to investigate various defining attributes of Southern Baptist Convention (SBC) churches. Only churches are included in the results and not every church reported all the demographic information or ACP statistics.

Demographic Highlights:

- 79% of churches are in the South region of the United States.
- A plurality of churches (44%) is in suburban areas.
- Seven in ten churches (69%) have an average AM worship attendance of less than 100.
- Around one-third of churches (31%) have 50% or less of worship attendance regularly involved in Sunday school or small groups.

Crosstab Highlights:

- Churches in the Northeast (54%) and West (59%) are most likely in urban areas.
- The Midwest (46%) and South (46%) churches are most likely in suburban areas.
- Around half of churches in the Northeast (46%), Midwest (51%), and West (47%) average between 1-49 AM worship attendees.
- Churches in suburban (36%) and urban (41%) are more likely to have 100+ attendees than those in rural areas (19%).

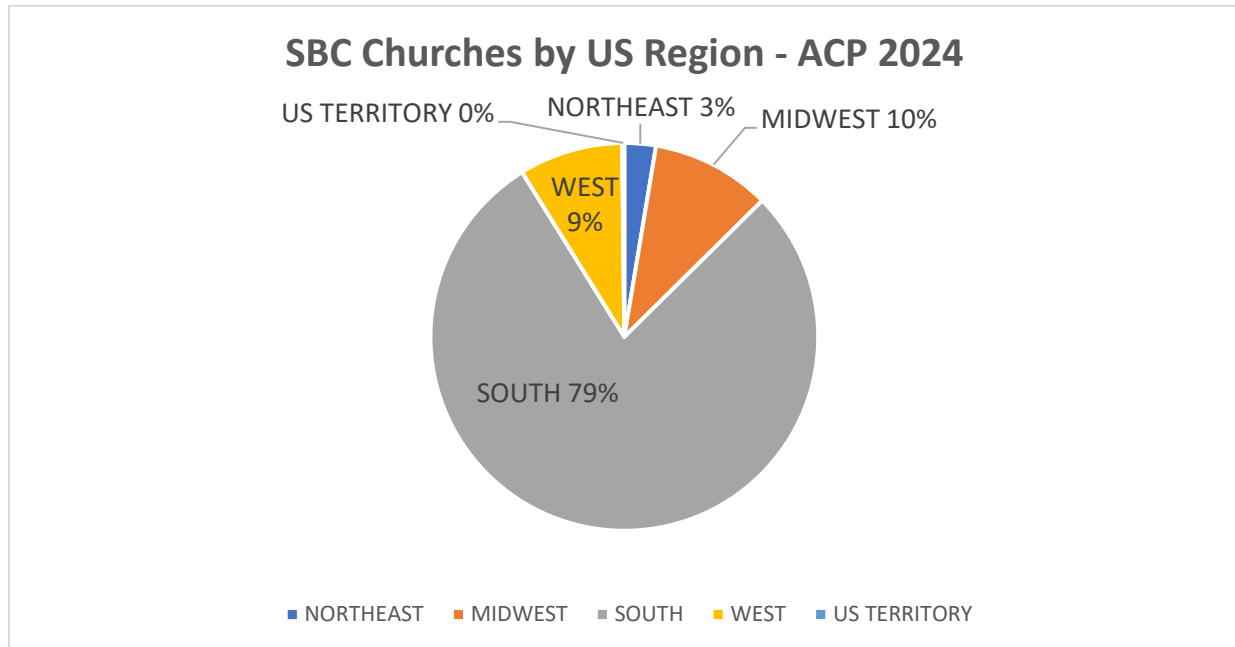

Compared to 2019 Highlights:

- Only the West region did not experience a decrease in the number of churches.
- There has been a change in the number of churches where only at most 25% of the worship attendees are involved in Sunday school or small groups. The percentage of SBC churches in this category went from 6% to 9%. There was an associated 23% increase in the number of churches reporting this level of participation.

The following pages contain graphs and tables for the attributes discussed above.
